

The NAB is too powerful and is trying to limit my right to get weather and traffic from any source I want. They want to maintain local broadcaster monopolies. Local radio is a wasteland. That's why people are subscribing to XM. Leave XM alone. NAB also is keeping people who cannot receive HDTV over the air, from viewing a national network feed. If they can't get the signal to me, give me freedom of choice. Allow Dish and Directv to deliver a national network feed.
